- d. Three submarines Newly painted light gray.

on the upper part of the conning tower plating there were four big holes about the size of a porthole. Apparently there was no glass in the holes.

The submarines lay alongside a quay that was framed with a stone edge, but the quay roadway was still under construction.

3. Building activity around the naval harbor:

- a. Some new horseshoe-shaped barracks are being built but the construction is making slow progress.
- b. Just north of the naval harbor there is some additional building activity. However, no building was observed which could be indicative of submarine bunkers.

7. Guard and control conditions in the harbor.

The control commission's arrival aboard was delayed because of the many ships that were in the harbor. [redacted] Guards were posted immediately on the ship's arrival; normally two men. Inspection was very light. Binoculars and cameras are no longer sealed up, just as it is no longer forbidden to use them during the stay in the harbor. 25X1
